** This space serves no real purpose unless one wishes to obtain signatures in protest of the organization mentioned above. It might also, however, be used to document the atrocities of the aforementioned group – but that would likely require a considerably *greater* amount of space. Best bet is to simply cut or perforate flyer at the above location, and then proceed to vehemently voice your *disdain* for all connected with the above party. Adjectives such as “sick” and “mean-spirited” should prove helpful.
